

Jobs and Internships

Internships and theses

Our product range in the field of software development supports all areas of cash logistics. As an expanding enterprise, we offer interns and students the opportunity to obtain impressions and experience in our Development Department within the framework of internships or final theses (Bachelor/Master/Diplom).

Your tasks in e.g. software development would include

- software design and development
- needs analysis and software tests
- database design and optimization (Oracle, MySQL, PostgreSQL)

Your qualifications

- experience with the following technologies desirable: Java, PHP, XML, SQL
- independent and goal-oriented style of work
- team and communication skills

Interns will receive an appropriate remuneration.

Please submit your complete application documents to:
